Production old in opencast mining

**License for own  
production to get here!**

Production new all over the world now possible

### **What are the benefits of a license from ytterstone®?**

1. Only one license is issued per country! Thus, as a licensee, I have the monopoly in my own country.
2. With the low production costs between 5-10 Dollar per m<sup>2</sup>, I can replace any other natural stone.
3. Very large gel savings when used on the facade, since **ytterstone®** is a light weight of approx. 2 kg / m<sup>2</sup>, not only on the material and the light processing, but above all on the statics.
4. **Ytterstone®** can be used everywhere, as for example on the façade, wall and floor inside as well as outside, additionally in all wet areas as baths, pools and also curves such as pillars is no problem.
5. **Ytterstone®** I can put on any subsoil and even on wood.
6. You get not only the know-how for the production, but also 17 years of experience in laying / application and in addition all test certificates such as Brandklasse A2.
7. Due to our binder and the fabric as a substrate, we can easily bridge cracks up to 5mm.

### **What is needed for production?**

1. A lot of sand in different colors.
2. Tissues
3. Binders
4. Crates 3 x 1.5m
5. Stone saw with diamond blade for dry cutting
6. Multifunction wheel loaders, such as Avant
7. Forklift truck
